Kalamazoo, MI • (269) 501-5405 • ibrahimitani0@gmail.com • [linkedin.com/in/ibrahimitani0](https://www.linkedin.com/in/ibrahimitani0) • <https://ibrahimitani0.github.io>

Software Engineer | Enterprise Applications

Software Engineer with 4+ years of experience designing, developing, and modernizing enterprise applications using Java, Spring Boot, Angular, Oracle SQL, and REST APIs. Experienced delivering workflow automation, cloud migrations, CI/CD pipelines, production support, and business reporting solutions across manufacturing and financial services environments. Skilled in developing scalable enterprise solutions, collaborating with business stakeholders, and applying Agile development practices throughout the software development lifecycle.

SKILLS

Programming Languages: Java, TypeScript, JavaScript, SQL, HTML5, CSS3, SCSS

Frameworks & Libraries: Angular, Spring Boot, JPA/Hibernate, Kendo UI, Angular Material

Backend & APIs: REST APIs, JUnit, JSP, Java Servlets, SMTP Email Services

Databases: Oracle SQL, PostgreSQL, MySQL, Microsoft SQL Server, MongoDB

DevOps & Cloud: AWS, Docker, Azure DevOps, Maven, CI/CD

Tools: Git, GitHub, Postman, Power BI, ServiceNow, SharePoint, Visual Studio Code

Concepts: Object-Oriented Programming (OOP), Design Patterns, System Design, SDLC, Agile Methodologies

WORK EXPERIENCE

Fouad Zeaiter and Associates - Ameriprise Financial Services, LLC

Portage, MI

Financial Services Operations & Technology Associate • Part-time

Mar 2026 - Present

- Assisted with the migration of financial plans from NaviPlan to MoneyGuide, validating data and supporting platform transition activities.
- Supported financial advisors by providing technology support, coordinating client service activities, and maintaining account and workflow information.
- Digitized client records and maintained client/portfolio data using CRM systems, AdvisorCompass, and Excel while leveraging Microsoft Copilot to streamline documentation, improve operational efficiency, and ensure data accuracy.

TATA Consultancy Services

Plymouth, MI

Software Engineer

Jan 2021 - Apr 2025

- Developed a manufacturing operations and analytics application using Angular, Spring Boot, Java, JPA/Hibernate, and Oracle SQL, delivering plant monitoring dashboards, reporting solutions, and REST APIs supporting 65,000+ users.
- Implemented a financial reporting and sustainability dashboard using Angular, Kendo UI, and Power BI to visualize plant budgets, material costs, CO₂ emissions, and other operational metrics for 50+ business users.
- Co-developed a cross-platform enterprise business application using Angular and MongoDB, implementing reactive forms, reusable components, lazy loading, data tables, filters, and validation workflows for desktop users while collaborating with mobile developers.
- Enhanced a Java EE enterprise application using Java Servlets, JSP, HTML, Oracle SQL, and SMTP email services, implementing request handling and automated notification workflows to support business operations.
- Migrated six Java EE applications from WebSphere and Tomcat to AWS by recompiling Maven projects, repackaging EJB modules, resolving cloud compatibility issues, and building Azure DevOps CI/CD pipelines with JUnit testing.
- Modernized corporate finance workflows for intercompany loans, equity funding, banking, and business establishment by migrating from Spring Boot/Angular to Mendix, redesigning domain models, integrating MsSQL server and SharePoint.
- Supported manufacturing, finance, and internal enterprise applications through ServiceNow by troubleshooting production issues, fixing defects, and coordinating QA testing and deployments.
- Mentored software engineers by onboarding team members, conducting code reviews, and collaborating with Product Owners and Business Analysts to demonstrate features, gather feedback, and refine requirements.

TECHNICAL PROJECTS

Vertex – Business Intelligence Platform (In Progress)

Angular • Java • Spring Boot • PostgreSQL • Power BI

- Developing a full-stack business intelligence platform using Java, Spring Boot, Angular, PostgreSQL, and REST APIs, implementing secure authentication, customer and project management, and inventory tracking.
- Integrating Power BI dashboards to transform operational data into interactive reports and actionable business insights.

PageFlipper – Library Management System

Angular • Spring Boot • MySQL

- Built features including book search, ordering, inventory management, community posts, reviews, Role based login, and a virtual assistant chatbot.

PokéCenter – Progressive Web App (PWA)

Angular • TypeScript • RxJS • Chart.js • REST APIs

- Developed a responsive single-page application using Angular, TypeScript, RxJS, and REST APIs, implementing dynamic routing, reusable components, and asynchronous data handling.
- Built features including an interactive Pokédex, team builder, trainer guides, and progress tracker, delivering a responsive user experience across desktop and mobile devices.

SmarCart – Cloud E-Commerce Platform

PHP • JavaScript • MySQL • AWS

- Developed and deployed a cloud-hosted e-commerce application using PHP, JavaScript, MySQL, and AWS, implementing user authentication, product catalog management, shopping cart, checkout, and order processing while leveraging Amazon EC2, S3, Lambda, and Elastic Load Balancing for scalable hosting, storage, serverless processing, and high availability.

EDUCATION

Bachelor’s degree, Computer Science

Western Michigan University

Aug 2017 - Apr 2020

Bachelor’s degree, Banking & Finance — International Business

Lebanese American University

Aug 2010 - Apr 2015

CERTIFICATIONS & AWARDS

Mendix Rapid Developer Certification
