Professional Summary

Full-stack Engineer specializing in **Angular**, **Java/Spring Boot**, and **SQL** with 4+ years of experience building web applications, **REST APIs**, and **microservices**. Designed financial, manufacturing dashboards, and data models, supporting a client in the automotive industry with **analytical** and **data-driven** solutions. Passionate about creating intuitive **UIs**, and scalable **backend systems**.

Skills

Languages: Java, JavaScript, TypeScript, C#, Python, PHP

Frontend: Angular, HTML5, CSS3, SCSS, Bootstrap, Angular Material, Vite

Backend: Spring Boot, Node.js, ASP.NET Core, .NET, Hibernate

Databases: Oracle SQL, MySQL, Microsoft SQL Server, MongoDB, PostgreSQL

DevOps & Cloud: AWS, GCP, Docker, Azure DevOps, GitHub Actions, Firebase

APIs & Integration: REST APIs, GraphQL, Postman

Tools & Platforms: Git, GitHub, Mendix, Godot Engine

Professional Experience

TATA Consultancy Services — Plymouth, MI

Software Engineer | Jan 2021 – Apr 2025

- Optimized **Angular** applications for 65,000+ users using **lazy loading**, **sorting**, and custom **search filters**, improving performance and stability
- Designed responsive **UIs** with **Angular/RxJS** for data handling and validation, reducing analyst manual work by 2+ hours/week
- Built **Java/Angular** components and **SQL queries** to process and validate **CSV** files, streamlining 7+ financial workflows
- Developed **REST APIs** and **JPA models** for **Oracle databases**, optimizing **SQL queries** across 2 **microservices**
- Automated email notifications using **Java Servlets** and **SMTP**, improving interdepartmental communication
- Migrated 6 applications to **AWS** using **Maven** and **Azure DevOps CI/CD** pipelines, improving deployment efficiency
- Implemented **Chart.js/GraphQL** data visualizations and maintained dual-region (**North American and European**) versions, ensuring global system stability and user experience consistency.
- Resolved production issues for a **C#/Angular** application, collaborating closely with product owners and team members to ensure rapid deployment of stability fixes.
- Rebuilt a legacy **Angular/Spring** application in **Mendix**, integrated **SQL Server**, and automated **SharePoint workflows** for 50+ users
- Handled user support tickets, addressing **bug** reports and fixing **production issues** to maintain operational continuity and a high client satisfaction index, earning the **Service & Commitment Award (Jan 2024)**.

Independent Software Developer — Remote

Independent | Apr 2025 – Present

- Developing a 2D pixel-art video game using **Godot**, focusing on gameplay mechanics, scene management, and GUI
- Building full-stack projects using **Java**, **Spring Boot**, **Angular**, and **SQL** with focus on **REST APIs** and responsive UI
- Applying software engineering best practices including modular design, version control, and iterative development

Ameriprise Financial Services — Portage, MI

Client Service Specialist (Part-Time) | Mar 2026 – Present

- Documenting client interactions, updating client data, and managing workflows within the Ameriprise CRM system
- Assisting advisors with maintaining client files, scheduled events, and appointments

Projects

Vertex - Point and Click Puzzle Game (*In Progress*) — (Godot Engine)

- Developing a 2D point-and-click puzzle game in Godot Engine, implementing interactive object systems, dynamic inventory UI, and modular scene architecture to support scalable gameplay and narrative progression.

Expensely - Expenses Tracker App (*In Progress*) — (Vite.js, JavaScript, HTML, CSS, Node.js, Postresgl)

- full-stack expense tracking app using Vite.js (JavaScript, HTML, CSS) with a Node.js/Express backend and PostgreSQL for secure data storage.

PageFlipper - A Library Web App — (Angular, Java Spring Boot, MySQL, Github Actions, Postman, Angular Material)

- Role-based login, book search, cart system, community posts, chatbot, and librarian CRUD operations

PokéCenter - A Progressive Web App (PWA) — (Angular, Python, MongoDB, Docker, Postman)

- Responsive web app with offline support, pokédex simulation. Used Python scripts to preprocess API data

TowerPinkster HelpHub - Senior Graduation Project — (C#, .NET, PowerShell, PDQ Deploy)

- Work management system with Google API sync, Selenium, and automated deployment via PowerShell/PDQ Deploy

SmarCart - Amazon store Mockup — (PHP, MySQL, HTML, Bootstrap, JS, AWS, EC2, LoadBalancers, S3, Lambda)

- Amazon store mockup featuring product browsing, cart management, and responsive UI

Education

Western Michigan University | Aug 2017 – Apr 2020

Bachelor's degree, *Computer Science*

Lebanese American University | Aug 2010 – Apr 2015

Bachelor's degree, *Banking & Finance* — *International Business*

Certifications & Awards

TATA Consultancy Services:

- Service & Commitment Award — **January 2024**
- Best Team Award — **October 2023**
- On the Spot (Team Award) — **December 2022**
- Mendix Rapid Developer Certification — **November 2023** — academy.mendix.com

Professional Development

TATA Consultancy Services | Oct 2024 - Nov 2024

Completed **Generative AI** trainings:

- Chatbot architecture using Large Language Models (LLMs)
- **Prompt** engineering, conversation flow design, and context management
- Integration concepts for chatbots with **APIs**, backend services, and enterprise systems
- Use cases for AI-assisted customer support and internal productivity tools

Completed **Cybersecurity** trainings:

- Fundamentals of cybersecurity threats, including malware, phishing, and social engineering attacks
- Secure password practices and authentication hygiene
- Identifying and preventing scam emails and malicious links
- Best practices for safe browsing and data protection in enterprise environments
