PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience designing, developing, and maintaining enterprise web applications using Java, Spring Boot, Angular, SQL, and REST APIs. Experienced building scalable backend services, responsive frontend applications, cloud-based deployments, and CI/CD pipelines while collaborating with cross-functional teams throughout the Agile software development lifecycle. Focused on delivering secure, maintainable software using modern engineering best practices and SOLID principles.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, SQL

Frontend: Angular, RxJS, HTML5, CSS3, SCSS, Angular Material, Kendo UI

Backend: Spring Boot, Hibernate/JPA, REST APIs, Microservices, JUnit

Databases: Oracle SQL, MySQL, MS SQL Server, PostgreSQL, MongoDB

DevOps & Cloud: AWS, Docker, Azure DevOps, Sharepoint

Tools: Git, GitHub, Postman, Power BI, Maven, Visual Studio Code

PROFESSIONAL EXPERIENCE

TATA Consultancy Services — Plymouth, MI

Software Engineer | Jan 2021 – Apr 2025

- Increased deployment reliability and system maintainability across six legacy Java enterprise applications by migrating WebSphere/Tomcat deployments to AWS, recompiling applications with Maven, repackaging EJB modules, and resolving cloud compatibility issues.
- Improved deployment consistency and environment stability by establishing Dev/QA environments, enhancing Azure DevOps CI/CD pipelines, integrating JUnit testing workflows to validate application functionality.
- Supported more than 65,000 active users by developing full-stack manufacturing and production analytics applications using Angular, RxJS, Chart.js, Spring Boot microservices, and Oracle SQL, delivering optimized REST APIs, dashboards, and data-driven reporting solutions.
- Automated business workflows and reduced manual processing effort by developing enterprise workflow solutions using Angular reactive forms, Spring Boot REST APIs, JPA/Hibernate, and Oracle SQL for data validation, document processing, and dashboard reporting.
- Built interactive enterprise dashboards using Angular, Kendo UI, and Power BI, supporting more than 50 users and improving reporting efficiency through automated data visualization and analytics workflows.
- Automated workflow communications by implementing event-driven email notification services using Java Servlets, SMTP, and JavaMail API, enabling real-time alerts for approvals, delays, and business events.
- Modernized a legacy Corporate Finance Portal by migrating application workflows to the Mendix low-code platform, redesigning domain models, integrating SharePoint document management and notifications.

Independent Software Engineer

Remote | Apr 2025 – Present

- Developing a Business Intelligence and Analytics platform using Angular, Spring Boot, PostgreSQL, and Power BI to deliver data-driven dashboards, reporting, and operational insights.
- Building full-stack applications using Angular, Spring Boot, PostgreSQL, and REST APIs, implementing authentication, database design, and responsive user interfaces.
- Implementing CI/CD pipelines using GitHub Actions and Docker to automate application deployment and improve development workflows.
- Utilizing Microsoft Copilot and Visual Studio Code to accelerate development workflows, improve code quality, and assist with debugging, refactoring, and implementation tasks.

Ameriprise Financial Services — Portage, MI

Technical Business Analyst (Part-Time) | Mar 2026 – Present

- Support enterprise CRM operations by analyzing, validating, and maintaining client data to ensure accuracy, consistency, and adherence to business processes.
- Collaborate with financial advisors to migrate client financial plans from Naviplan tool to Money Guide ensuring accurate data transfer and continuity of financial planning processes.
- Assist financial advisors with technology adoption, workflow improvements, and system-related troubleshooting across client servicing platforms.
- Manage client information updates, documentation workflows, and data validation processes using CRM tools and Excel.
- Utilize Microsoft Copilot and CRM capabilities to improve documentation workflows and daily productivity.

Projects

PageFlipper - A Library Web App — (Angular, Java, Spring Boot, MySQL, Github, Postman, Angular Material)

- Role-based login, book search, cart system, community posts, chatbot, and librarian CRUD operations.

Expensely - Expenses Tracker App (In Progress) — (Vite.js, JavaScript, HTML, CSS, Node.js, PostgreSQL)

- Full-stack expense tracking application with Vite.js, Node.js/Express, and PostgreSQL for data management.

PokéCenter - A Progressive Web App (PWA) — (Angular, Python, MongoDB, Docker, Postman)

- Responsive web app with offline support, pokedex simulation. Used Python scripts to preprocess API data.

SmarCart - Amazon store Mockup — (PHP, MySQL, HTML, Bootstrap, JS, AWS, EC2, LoadBalancers, S3, Lambda)

- Amazon store mockup featuring product browsing, cart management, and responsive UI.

Education

Western Michigan University | Aug 2017 – Apr 2020

Bachelor's degree, Computer Science

Lebanese American University | Aug 2010 – Apr 2015

Bachelor's degree, Banking & Finance — International Business

Certifications & Awards

TATA Consultancy Services:

- Service & Commitment Award — January 2024
- Best Team Award — October 2023
- On the Spot (Team Award) — December 2022
- Mendix Rapid Developer Certification — November 2023 — academy.mendix.com

Professional Development

TATA Consultancy Services:

Generative AI for Software Engineering – Oct 2024

- Enterprise LLM architecture, prompt engineering, chatbot integration, API connectivity, and AI-assisted software development.

Cybersecurity – Nov 2024

- Enterprise secure coding awareness and cybersecurity best practices.
